

MEM, with NEAA, powder

Cat. No: PM150410P
Size: 1×10L

General Information

Product Form	Powder
pH	7.2-7.4
D-glucose	1000mg/L
HEPES	negative
L-glutamine	2mM
NaHCO ₃	negative
Phenol red	10mg/L
NEAA	Positive
Sodium pyruvate	negative
Storage	2-8°C ,Shading Light
Shipping	RT
Expiration date	36 months

Background

MEM medium (Minimum Essential Medium) was developed on the basis of Eagle basic medium. It is one of the most basic and widely used culture medium, and one of the most commonly used culture medium in animal cell culture. MEM medium contains 12 kinds of essential amino acids, glutamine and 8 vitamins, which is simple, mainly used in the culture of adherent cells. MEM (contain NEAA) medium is added L-alanine, L-glutamic acid, L-asparagine, L-aspartic acid, L-proline, L-serine and glycine on the basis of MEM medium. These 7 kinds of NEAA, can reduce the side effects of producing non-essential amino acids during cell culture and promote cell proliferation and metabolism. This product contains many kinds of amino acids, vitamins, inorganic salts and other ingredients for cell culture, but does not contain protein, lipids or any growth factors. Therefore, the product should be used with serum or serum-free additives.

Notes

1. This product is for research use only.;
2. It is necessary to pay attention to the aseptic operation and avoid the contamination.
