

## CKMT1A Polyclonal Antibody

<b>Catalog No.</b>	E-AB-12590	<b>Reactivity</b>	H
<b>Storage</b>	Store at -20°C. Avoid freeze / thaw cycles.	<b>Host</b>	Rabbit
<b>Applications</b>	IHC,ELISA	<b>Isotype</b>	IgG

**Note:** Centrifuge before opening to ensure complete recovery of vial contents.

### Images

Immunohistochemistry of paraffin-embedded Human breast cancer tissue using CKMT1A Polyclonal Antibody at dilution 1:100

Immunohistochemistry of paraffin-embedded Human lung cancer tissue using CKMT1A Polyclonal Antibody at dilution 1:100

### Immunogen Information

<b>Immunogen</b>	Synthetic peptide of human CKMT1A/CKMT1B
<b>Gene Accession</b>	NP_066270
<b>Swissprot</b>	P12532
<b>Synonyms</b>	CKMT,CKMT1,UMTCK

### Product Information

<b>Buffer</b>	PBS with 0.05% sodium azide and 50% glycerol, PH7.4
<b>Purify</b>	Affinity purification
<b>Dilution</b>	IHC 1:50-1:200

### Background

Mitochondrial creatine (MtCK) kinase is responsible for the transfer of high energy phosphate from mitochondria to the cytosolic carrier, creatine. It belongs to the creatine kinase isoenzyme family. It exists as two isoenzymes, sarcomeric MtCK and ubiquitous MtCK, encoded by separate genes. Mitochondrial creatine kinase occurs in two different oligomeric forms: dimers and octamers, in contrast to the exclusively dimeric cytosolic creatine kinase isoenzymes. Many malignant cancers with poor prognosis have shown overexpression of ubiquitous mitochondrial creatine kinase; this may be related to high energy turnover and failure to eliminate cancer cells via apoptosis. Ubiquitous mitochondrial creatine kinase has 80% homology with the coding exons of sarcomeric mitochondrial creatine kinase. Two genes located near each other on chromosome 15 have been identified which encode identical mitochondrial creatine kinase proteins.

#### For Research Use Only

Thank you for your recent purchase.
