

## AFP Polyclonal Antibody

<b>Catalog No.</b>	E-AB-13768	<b>Reactivity</b>	H
<b>Storage</b>	Store at -20°C. Avoid freeze / thaw cycles.	<b>Host</b>	Rabbit
<b>Applications</b>	WB,IHC,ELISA	<b>Isotype</b>	IgG

**Note:** Centrifuge before opening to ensure complete recovery of vial contents.

### Images

Western Blot analysis of Human liver cancer tissue using AFP Polyclonal Antibody at dilution of 1:1000

Immunohistochemistry of paraffin-embedded Human liver cancer using AFP Polyclonal Antibody at dilution of 1:60

Immunohistochemistry of paraffin-embedded Human tonsil using AFP Polyclonal Antibody at dilution of 1:60

### Immunogen Information

<b>Immunogen</b>	Recombinant protein of human AFP
<b>Gene Accession</b>	BC027881
<b>Swissprot</b>	P02771
<b>Synonyms</b>	FETA,HPAFP

### Product Information

<b>Calculated MW</b>	69kDa
<b>Buffer</b>	PBS with 0.05% sodium azide and 50% glycerol, PH7.4
<b>Purify</b>	Affinity purification
<b>Dilution</b>	WB 1:1000-1:5000, IHC 1:50-1:200

### Background

This gene encodes alpha-fetoprotein, a major plasma protein produced by the yolk sac and the liver during fetal life. Alpha-fetoprotein expression in adults is often associated with hepatoma or teratoma. However, hereditary persistence of alpha-fetoprotein may also be found in individuals with no obvious pathology. The protein is thought to be the fetal counterpart of serum albumin, and the alpha-fetoprotein and albumin genes are present in tandem in the same transcriptional orientation on chromosome 4. Alpha-fetoprotein is found in monomeric as well as dimeric and trimeric forms, and binds copper, nickel, fatty acids and bilirubin. The level of alpha-fetoprotein in amniotic fluid is used to measure renal loss of protein to screen for spina bifida and anencephaly.

### For Research Use Only

Thank you for your recent purchase.
