## Recombinant SARS-CoV-2 NSP8 Protein (His Tag)

Catalog Number: PKSR030470

Note: Centrifuge before opening to ensure complete recovery of vial contents.

**Description** 

Synonyms SARS-CoV 2 nsp8
Species SARS-CoV-2

**Expression Host** E.coli

Sequence Ala1-Gln198 Accession YP 009725304.1

Calculated Molecular Weight 25 kDa
Observed molecular weight 25 kDa
Tag C-His

**Properties** 

**Purity** > 85 % as determined by reducing SDS-PAGE.

**Endotoxin**  $< 1.0 \text{ EU per } \mu \text{g of the protein as determined by the LAL method.}$ 

Storage Storage Store at < -20°C, stable for 6 months. Please minimize freeze-thaw cycles.

**Shipping** This product is provided as liquid. It is shipped at frozen temperature with blue

ice/gel packs. Upon receipt, store it immediately at < - 20°C.

Formulation Supplied as a 0.2 μm filtered solution of 20mM Tris-HCl, 150mM NaCl, 10%

Glycerol, pH 8.5.

**Reconstitution** Not Applicable

## **Background**

Cleavage by the viral main protease, 3CLpro results in generating the nsp8 protein, The nsp8 protein has been shown to associate with several other nsps and to colocalize with these nsps in cytoplasmic complexes that are important for viral RNA synthesis. It forms a hexadecamer with nsp7 (8 subunits of each) that may participate in viral replication by acting as a primase. Alternatively, may synthesize substantially longer products than oligonucleotide primers. Nsp8 was shown to have RNA-dependent RNA polymerase (RdRp) activity that could be involved in producing primers utilized by nsp12 which is normally accepted to be the RdRp for SARS-CoV.
