Recombinant Rat KLK10 Protein (His Tag)

Catalog No. PKSR040472

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Synonyms Breast normal epithelial cell associated serine protease, Kallikrein related peptidase

10, Kallikrein10, KLK 10, KLK10, NES 1, NES1, Normal epithelial cell-specific 1,

Protease serine like 1, Protease serine-like 1, PRSS L1, PRSSL 1, PRSSL1

Species Rat E.coli **Expression Host**

Pro19-Pro259 Sequence P36375-1 Accession Calculated Molecular Weight 27.1 kDa Observed molecular weight 29.35 kDa N-His Tag

Bioactivity Testing in progress

Properties

Purity > 85 % as determined by reducing SDS-PAGE.

Endotoxin Please contact us for more information.

Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to **Storage**

-80°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots

of reconstituted samples are stable at < -20°C for 3 months.

Shipping This product is provided as lyophilized powder which is shipped with ice packs.

Formulation Lyophilized from sterile PBS, pH 7.4.

Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as

protectants before lyophilization.

Please refer to the specific buffer information in the printed manual.

Reconstitution Please refer to the printed manual for detailed information.

Data

> 85 % as determined by reducing SDS-PAGE.

Kallikreins are a subgroup of serine proteases having diverse physiological functions. Growing evidence suggests that many kallikreins are implicated in carcinogenesis and some have potential as novel cancer and other disease biomarkers. This gene is one of the fifteen kallikrein subfamily members located in a cluster on chromosome 19. Its encoded protein is secreted and may play a role in suppression of tumorigenesis in breast and prostate cancers. Alternate splicing of this gene results in multiple transcript variants encoding the same protein.
