A Reliable Research Partner in Life Science and Medicine

# Recombinant Human SLAM Family Member 7/SLAMF7/CD319/CRACC (C-mFc)

Catalog No. PKSH033992

Note: Centrifuge before opening to ensure complete recovery of vial contents.

### **Description**

Synonyms SLAM Family Member 7;CD2 Subset 1;CD2-Like Receptor-Activating Cytotoxic

Cells;CRACC;Membrane Protein FOAP-12;Novel Ly9;Protein

19A;CD319;SLAMF7;CS1

Species Human

Expression Host

Sequence
Ser23-Met226
Accession
Q9NQ25
Calculated Molecular Weight
Observed molecular weight
Tag

HEK293 Cells
Ser23-Met226
49.0 kDa
60-90 kDa
C-mFc

# **Properties**

**Purity** > 95 % as determined by reducing SDS-PAGE.

**Endotoxin** < 1.0 EU per µg of the protein as determined by the LAL method.

**Storage** Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to

-80°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots

of reconstituted samples are stable at < -20°C for 3 months.

**Shipping** This product is provided as lyophilized powder which is shipped with ice packs.

**Formulation** Lyophilized from a 0.2 µm filtered solution of PBS, pH 7.4.

Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as

protectants before lyophilization.

Please refer to the specific buffer information in the printed manual.

**Reconstitution** Please refer to the printed manual for detailed information.

#### Data

> 95 % as determined by reducing SDS-PAGE.

SLAMF7 is a single-pass type I membrane protein and contains 1 Ig-like C2-type (immunoglobulin-like) domain. SLAMF7 is expressed in NK cells, activated B-cells, NK-cell line but not in promyelocytic, B-cell lines, or T-cell lines. Although the cytoplasmic domain of CS1 contains immunoreceptor tyrosine-based switch motifs (ITSM), which enables to recruite signaling lymphocyte activation molecule (SLAM)-associated protein (SAP/SH2D1A), it activates NK cells in the absence of a functional SAP. SLAMF7 positively regulated natural killer cell functions by a mechanism dependent on the adaptor EAT-2 but not the related adaptor SAP. However, in the absence of EAT-2, CRACC potently inhibited natural killer cell function. It was also inhibitory in T cells, which are typically devoid of EAT-2. Thus, SLAMF7 can exert activating or inhibitory influences on cells of the immune system depending on cellular context and the availability of effector proteins.
