Recombinant Rhesus Macaque CD79B/B29 (C-Fc)

Catalog No. PKSQ050110

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Synonyms B-Cell Antigen Receptor Complex-Associated Protein Beta Chain; B-Cell-Specific

Glycoprotein B29;Ig-Beta;Immunoglobulin-Associated B29

Protein;CD79b;CD79B;B29;IGB

Species Rhesus Macaque HEK293 Cells **Expression Host** Ala30-Asp161 Sequence Accession H9ZFT8 Calculated Molecular Weight 42.2 kDa Observed molecular weight 50-60 kDa C-Fc Tag

Properties

Purity > 95 % as determined by reducing SDS-PAGE.

Endotoxin < 1.0 EU per µg of the protein as determined by the LAL method.

Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to Storage

-80°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots

of reconstituted samples are stable at < -20°C for 3 months.

Shipping This product is provided as lyophilized powder which is shipped with ice packs.

Formulation Lyophilized from a 0.2 µm filtered solution of PBS, pH 7.4.

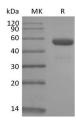

Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as

protectants before lyophilization.

Please refer to the specific buffer information in the printed manual.

Reconstitution Please refer to the printed manual for detailed information.

Data

> 95 % as determined by reducing SDS-PAGE.

Background

CD79B is a single-pass type I membrane protein. CD79B contains one Ig-like V-type domain and one ITAM domain. CD79B is required in cooperation with CD79A for initiation of the signal transduction cascade activated by the B-cell

antigen receptor complex (BCR), which leads to internalization of the complex, trafficking to late endosomes and antigen presentation. CD79B enhances phosphorylation of CD79A, possibly by recruiting kinases that phosphorylate CD79A or by recruiting proteins that bind to CD79A and protect it from dephosphorylation.
